FortiFlora®

CANINE AND FELINE PROBIOTIC SUPPLEMENTS

The Power to Nutritionally Manage
Dogs and Cats with

Gastrointestinal Upset

Intestinal problems are one of the most common reasons dogs and cats are brought to their veterinarians. A healthy intestinal tract is home to thousands of bacteria that are in balance, working to protect the intestine from harmful bacteria. A pet with intestinal upset often experiences an imbalance of these bacteria, which can contribute to diarrhea, soft stools or excessive gas. Purina® Pro Plan Veterinary Diets® FortiFlora® Canine and Feline Probiotic Supplements contain a special strain of beneficial bacteria that is safe and effective and has been proven to promote intestinal balance.

Benefits of FortiFlora®:

- Probiotic supplement for the dietary management of cats & dogs with diarrhea
- Promotes a strong immune system
- Proven to promote intestinal health & balance
- Contains guaranteed amounts of live active cultures

FortiFlora® can be used in the nutritional management of dogs and cats with:

- Diarrhea associated with microflora imbalance
- Acute enteritis
- Diarrhea associated with stress, antibiotic therapy, and diet change
- Poor fecal quality in puppies and kittens
- Flatulence in dogs

Our commitment to you and your pets

Purina® Pro Plan Veterinary Diets® is committed to helping you and your veterinarian make a true difference in your pet's life. Our diets are backed by extensive testing and scientifically formulated to help nutritionally manage dogs and cats with certain medical conditions.

The science behind our therapeutic diets represents a collaboration between Purina pet nutrition experts and veterinarians, resulting in proven nutritional breakthroughs and great-tasting formulas produced with high safety standards.
